Who is Lucky Rabbit?

We are a non-status quo digital services firm with 7+ years of experience using lean practices and agile methods to bridge the gap between old and new cultures to reimagine human capital aspects of the digital transformation journey to shift an organization to agile.

LUCKY RABBIT IS NOT JUST ANOTHER DIGITAL SERVICES

We focus on simplistically designed solutions that delivers quantum improvements using technology and data to improve people's quality of life, influences economic development, and reduces the technology gaps in communities.

12	4M+	34M
Completed analytics, design, engineering, and organizational projects	Federal government employees and their families with healthcare	Persons served as part of our support for CMS.gov & Medicare.gov

The infographic has a dark green background with a faint, glowing green rabbit head silhouette on the right side. The text is in white and light green.

How we help our clients?

Our approaches are not just for software development, but for adaptive organizational change focused on competencies needed to realize the business value of our client's investments in IT. Lucky Rabbit is at the forefront of a movement in government to deliver simplistically designed innovations that provide quantum improvements using technology and data to improve people's quality of life, influences economic growth and development, and reduces the technology gaps for our clients and the communities they serve. This movement for new digital capabilities in government has allowed our firm to support a broad set of clients, which include:

- Centers for Medicare & Medicaid Services (CMS)
- Office of Personnel Management (OPM)
- Department of Homeland Security (DHS) U.S. Citizenship and Immigration Services (USCIS)
- Fearless
- Maryland Partnership for Prevention
