

# REMIANT SECUREONE FOR GOVERNMENT

## CAPABILITY STATEMENT

### What is Remediant SecureONE?

- Created by security practitioners, SecureONE brings new cybersecurity controls to **Privileged Access Management** across all computers in an organization

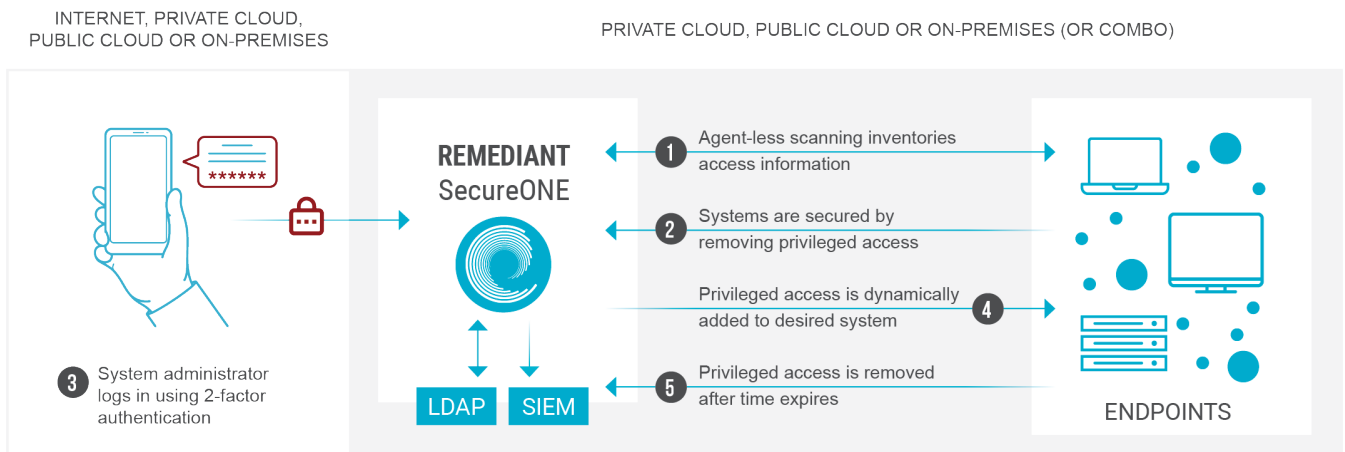

### Core Competencies

- Rapidly assess who has **privileged access** on what computers
- Facilitates insight and control over **Windows, Mac OS X and Linux** admins
- Ease admin access for **DevOps** engineers
- Operates in **air-gapped environments**
- Replaces shared accounts / shared passwords with **Just In Time Access**
- Definitively **stop lateral movement** of malware, human attackers and malevolent insiders using compromised admin credentials

### Key Differentiators

- Agent-less, vault-less deployment: Can be deployed on virtual or physical appliances in **less than 60 mins**
- Continuous Discovery:** Be alerted immediately as admin rights change on any computer
- Just In Time Access: Allocate privileged access on an **time-limited, as-needed basis**
- Apply **Multi-factor authentication** to Privileged Access without installing software agents

## HOW IT WORKS

## WORK WITH US

### Programs

- SBIR Phase I awardee (USAF)
- NASA SEWP V, GSA Schedule 70
- CAGE code 7ZE69, DUNS 080378801
